

LAB 1

The Zen Garden Reloaded

DESCRIPTION

Employ some CSS selectors to achieve some of the amazing feats below using the HTML5 version of the ever-popular CSS Zen Garden.

INSTRUCTIONS

Using the CSS selectors discussed in class today, attempt the following using an embedded stylesheet in the provided HTML5 file:

1. Set all `<h3>` elements to the color red.
2. Color green all `<p>` elements that belong to the `class="intro"`.
3. Color orange all text inside the `<section>` element with the `id="requirements"`.
4. Set all `<h3>` elements to the color pink ONLY when they are contained by a `<nav>` element.
5. Set the first line of all `<p>` elements to **font-weight: bold**.
6. Set **background-color: yellow** on all `<a>` elements with a *title* attribute.
7. Make both `<h1>` and `<h2>` elements purple.
8. Put a thin black box (`border: 2px solid black`) around ONLY the `<section>` element that is *directly* contained inside the `<body>` element.
9. Change the *first* paragraph in each section to UPPERCASE.
10. Set the background-color of every 3rd `<p>` element to lightblue.
11. Render the *last* `<p>` element in every section with a 5px solid *hotpink* border on the bottom.
12. Render any `<p>` that immediately follows an `<h3>` with a 5px dashed *limegreen* border on the top.
13. Set any `<abbr>` elements with a title attribute that reads, "Cascading Style Sheets" to `background-color: black`, with white text.
14. Submit your HTML and CSS to the exercise in Blackboard.
15. Compare your submission to the provided solutions code in Blackboard.
